

# Dlažba 2

Máme základnú plochu.

V nej označíme jednotlivé menšie plochy.

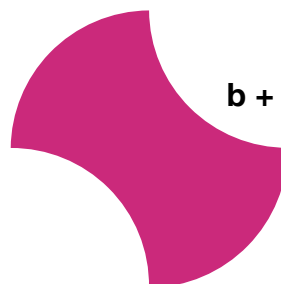

Nižšie sú ukážky, ako sa dajú rôzne plochy zo základnej plochy zapísať pomocou **abc**.

**a + b**

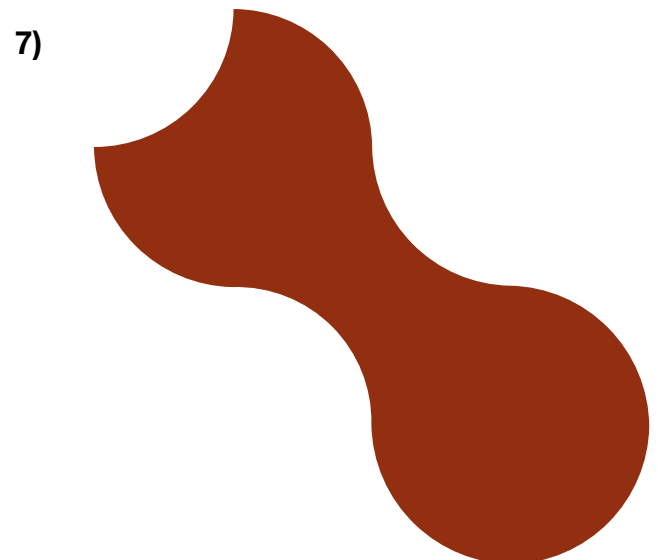

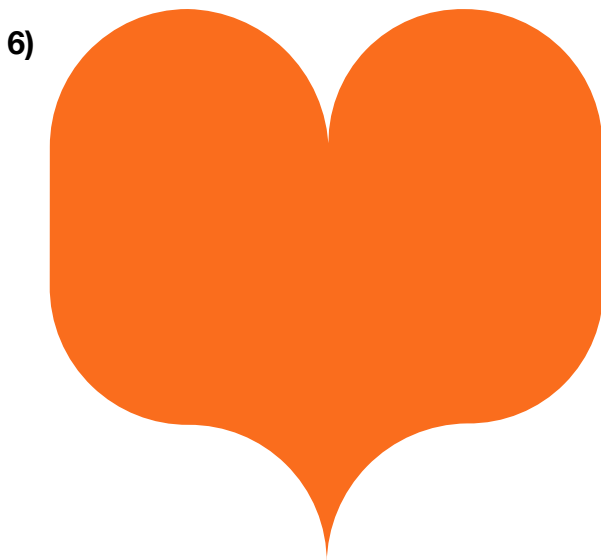

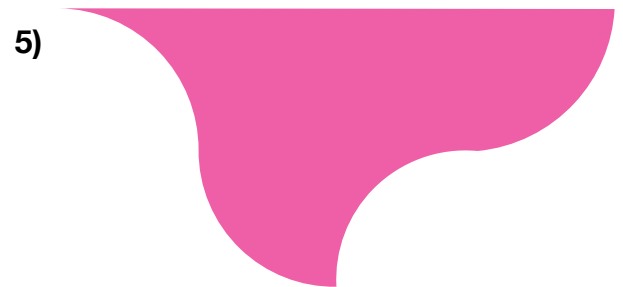

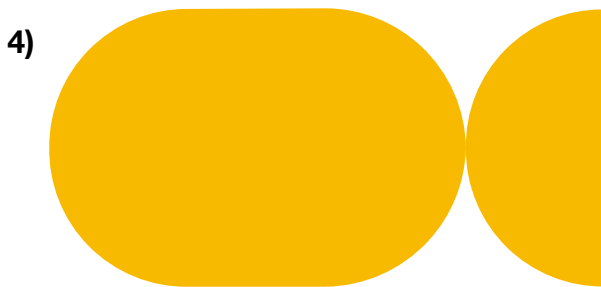

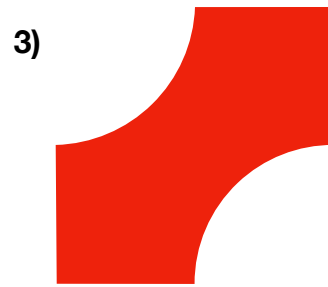

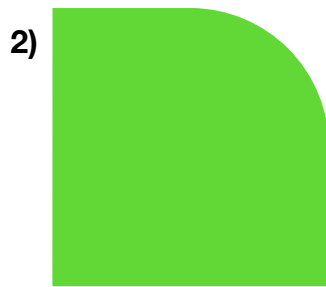

**b + c**

**b + b + c + c = 2b + 2c**

Zapíš nižšie uvedené plochy pomocou **abc**.

Teraz vymysli nejaké vlastné plochy, zakresli a zapíš ich.
